UVATERV designed a central building and a concrete batching plant for the client in a plot of Danubiusbeton Ltd. having an area of 9 000 m² and located in Bojtár street in an industrial zone in District III of Budapest.

An office and dispatcher building is designed along the street with ground floor + 2 floors. The building is supported with a frame on cast-in-place r.c piers. The concrete batching plant established behind the building is based on German technology.
